Full-Stack Developer

## PROFILE SUMMARY

---

I am a Bachelor of Business Information Technology (BBIT) student with a strong passion for website development and data analysis. My academic journey has equipped me with a solid foundation in both the technical and business aspects of IT, enabling me to develop user-friendly and efficient web applications, as well as derive meaningful insights from data. As a full-stack engineer, I have experience in designing and implementing complete web solutions, from front-end interfaces to back-end systems, ensuring seamless functionality and user experience. I am now eager to expand my expertise further in the field of web development, aiming to leverage advanced technologies and best practices to create innovative and impactful web solutions.

I will be available from January 2025 to June 2025 for any internship roles that will enable me to nurture my skills and contribute effectively to your organization.

## PROJECTS

---

**MaidBora** | HTML, CSS, PHP, Laravel & MYSQL

**April 2023 – July 2023**

MaidBora is a web application that seeks to connect homeowners to social skill workers, e.g., housemaids, chefs, or babysitters. This application was built to bridge the gap between both social workers and homeworkers, as in the past it has been seen to be very tiresome to find reliable help through traditional means. By providing a streamlined platform for matching the needs of homeowners with the skills of social workers, MaidBora simplifies the process, making it more efficient and trustworthy for both parties involved.

**EduSense** | HTML, CSS, JavaScript & Flask

**April 2024 – November 2024**

EduSense is a web-based application designed to streamline student management processes in educational institutions. The platform connects students, lecturers, mentors, and administrators by providing a centralized system for managing academic records, tracking attendance, and evaluating performance. EduSense leverages data-driven insights and machine learning models to predict student outcomes, such as dropout risks, enabling proactive interventions. By automating administrative tasks and enhancing academic monitoring, EduSense fosters a more efficient, transparent, and supportive educational environment for all stakeholders.
